EDUCATION

DSATM, BENGALURU
B.E. Information Science
Oct 2024 – Oct 2028 | CGPA: 8.6

AAKASH INSTITUTE
Class 11 & 12 (PCMB)
Jun 2022 – May 2024 | 92%

ST. PAUL'S ENGLISH SCHOOL
ICSE
2020 – 2022 | 86%

SKILLS

LANGUAGES
Python • Java • C • JavaScript • TypeScript • PHP • SQL

AI AND COMPUTER VISION
OpenCV • YOLO (Ultralytics) • PyTorch • scikit-learn • Pandas • MediaPipe • Gemini and OpenAI APIs

WEB AND BACKEND
React • Next.js • Django • FastAPI • Flask • Express • Three.js • Tailwind CSS • HTML/CSS • REST APIs

DATA AND TOOLS
PostgreSQL • MySQL • SQLite • Git • Docker • Linux/Unix • Jupyter • Pytest • Arduino

ACHIEVEMENTS

Formula Bharat 2026
First DSATM team at the event
Smart India Hackathon 2026
Built for two problem statements
Build 4 Karnataka AI Buildathon
ComedKares, Sep 2026
Gen AI and AIML Hackathons
IISc Bengaluru, Oct 2025
ALGO-RYTHM 2024, Algo-Rave 2025
DSATM hackathons

CERTIFICATIONS

Professional Program in AI, ShikshaVertex
Full Stack Web Development with AI, NSDC
AI and ML, Mastering GenAI, Vital Skills
Java, DSA, DBMS and SQL, Unix and Linux, IoT, Infosys Springboard

EXPERIENCE

ECOPROSUS | Software Intern
Aug 2026 – Oct 2026 | Bengaluru (Hybrid)

- Designed and built computer vision software with Python and OpenCV, applying machine learning models to image and video input.

SHIKSHAVERTEX | AI Intern (Microsoft Certified)
Jul 2026 – Sep 2026 | Remote

- Completed the Professional Program in Artificial Intelligence, working through data analysis and model building with Pandas in Jupyter.

VULCAN RACING | Core Team (Formula Student, DSATM)
Sep 2025 – Present | Bengaluru

- Part of the first DSATM team to compete at Formula Bharat (2026).
- Handle sponsorship, outreach and planning for the 2027 season.
- Build and maintain the team website in Next.js, React and Tailwind CSS.

PROJECTS

DEPTHWIZARD | Satellite Image to 3D Terrain (SIH 2026)

- Estimates elevation from a single optical satellite image with Depth Anything V2, calibrated to metric height against reference DEMs.
- Interactive Three.js viewer with flood and landslide analysis, on a FastAPI and PyTorch backend with 50 automated tests.

CYBERTRACE AI | Cybercrime Money-Trail Forensics (SIH 2026)

- Team project that traces multi-hop UPI mule networks and ranks likely ATM cash-out locations with a scikit-learn model.
- React, TypeScript and Express, with Leaflet maps and React Flow.

FUNDVAULT | Multi-Tenant Fund Management Platform

- Django and Next.js ledger platform where each organisation connects its own PostgreSQL database, with role-based access and audit logs.
- Extracts ledger entries from receipt images with Gemini or OpenAI models.

WASTE VISION SYSTEM | Bin Fill-Level Detection

- Detects bins in images and video streams with YOLOE, segments the waste with YOLO11 and reports fill percentage in a Streamlit dashboard.

BLOC-CHAT | Encrypted Peer-to-Peer LAN Messenger

- Serverless Python and PyQt6 app for text, voice and video over a local network, encrypted with RSA-2048 and AES-256-GCM.
- Stores messages in a SHA-256 hash chain so tampering is detectable.

INCOIS OCEAN3D | 3D Ocean Data Visualisation

- Three.js scene of the northern Indian Ocean showing model fields alongside real Argo float, glider, CTD and mooring profiles.
