EDUCATION

DAYANANDA SAGAR ACADEMY OF TECHNOLOGY MANAGEMENT

B.E. INFORMATION SCIENCE
ENGINEERING
2024 -- 2028
CGPA: 8.6

AAKASH INSTITUTE -- GR PU COLLEGE

12TH PU (PCMB)
2022 -- 2024
92

ST. PAUL'S ENGLISH SCHOOL ICSE

2020 -- 2022
86

SKILLS

Programming Python Java C JavaScript PHP SQL

Web Development HTML CSS Django Next.js REST APIs

Tools Git OpenCV MediaPipe SQLite3 Linux / Unix

ACHIEVEMENTS

Formula Bharat 2026 ALGO-RYTHM
2024 Algo-Rave Hackathon

CERTIFICATIONS

AI ML - IISc Bangalore Mastering
Generative AI - IISc Bangalore Internet of Things
Programming Using Python
Programming in C DBMS SQL

INTERESTS

Full Stack Development Computer Vision
IoT Applications Renewable Energy
Video Editing

PROJECTS

ADAPTICONTROL | AI-POWERED ACCESSIBILITY SYSTEM

- Developed an assistive platform enabling computer control through hand gestures and voice commands.
- Utilized OpenCV, MediaPipe, SpeechRecognition, PyAutoGUI, Ollama AI, and automation tools.
- Built during a hackathon to improve accessibility for users with physical disabilities.

FUND MANAGEMENT SYSTEM | FULL STACK FINANCIAL PLATFORM

- Developed a centralized platform for investor management, transaction tracking, balances, and reporting.
- Built an initial version using HTML, CSS, JavaScript, and SQLite3.
- Re-engineered the application using Django, Next.js, and REST APIs.

DATA STRUCTURE SIMULATION VISUALIZER | EDUCATIONAL WEB APPLICATION

- Created an interactive visualization platform for learning data structures.
- Implemented animated operations and step-by-step simulations.
- Built using PHP, CSS, and JavaScript.

REAL-TIME WIFI VIDEO TRANSMISSION | PYTHON NETWORKING PROJECT

- Built a low-latency local video streaming solution using OpenCV and TCP sockets.
- Enabled internet-free transmission across devices connected to the same WiFi network.
- Designed with future support for encryption, IoT integration, and analytics.

ELYSIUM | ALGAE-BASED AIR PURIFICATION SYSTEM

- Designed a compact photobioreactor using Chlorella vulgaris for urban CO₂ absorption.
- Applied research, prototyping, testing, and community-feedback driven design.
- Explored sustainable air-quality solutions for dense urban environments.

LEADERSHIP

VULCAN RACING | HEAD OF BUSINESS OPERATIONS

Formula Bharat 2027

- Core member of the student Formula team designing and building a Formula-style race car.
- Leading sponsorship acquisition, outreach activities, and strategic planning.
- Developing and maintaining the official club website and digital presence.
